

Interpreting in business negotiations

Dear colleagues,

little is known about the manifold – communicative – tasks **interpreters** undertake in **business negotiations**. Therefore I am looking for participants for the following survey: <https://www.soscisurvey.de/interpretinginnegotiations/>

This survey is part of my master's thesis I am writing at the University of Vienna's Institute for Business Decisions and Analytics.

As a graduate of the Centre for Translation Studies of the University of Vienna I hope to bring these two research fields – interpreting and business decisions and analytics – closer to each other.

If you have experience in interpreting and have at least once interpreted in a business negotiation and can spare about 15 minutes to participate in my survey, I would be very grateful. In case you know colleagues who may be interested in and eligible for this survey, please feel free to forward them this text.

Any information you provide in the survey will be entirely anonymous within the reporting and analysis. The survey server and operator, SoSci Survey, are located in Munich, Germany, and data will be processed in accordance with the GDPR and the BSG. The data transmission is fully SSL-encrypted.

If you have any questions, please do not hesitate to write me.

Thank you and best regards.
